

# Sending the Employee to the Medical Provider

## **For serious injuries**

Immediately dial 911. The paramedics will determine the most appropriate treatment facility. For urgent care in emergency situations, the priority is finding the best treatment. Utilizing an MPN provider is not the priority.

## **For all other injuries**

Treatment - Refer the injured employee to the facility listed on your posted medical panel. If for some reason this provider cannot accept your employee, you can access the medical panel options by visiting <http://www.lwpclaimsplatinummpn.com>.

Transportation - It is not uncommon for employers to drive the employee to the designated medical provider. The employer must assess the individual situation but should consider this as a show of support.

Provide Documentation - We suggest you send the employee to the designated medical provider with the following two documents:

- ✓ Employer's Approval for Medical Attention
  
- ✓ Tangram Insurance Services Workers' Compensation Program  
*this document will assist the physician in directing all ancillary services to the network providers*
